NISSHINBO

ROLMAN WORLD & NISSHINBO

Nisshinbo Brake Part of the Nisshinbo Holdings company, owner of Germany's TMD Friction Group, is the world's leading friction supplier. Friction material production started in 1944 and developed rapidly as Japan increasingly motorised.

Nisshinbo is first choice for Japan's automotive vehicle manufacturers, and their product range covers in excess of 90% of cars manufactured in Japan. Their OEM quality is naturally reflected in their general replacement friction material products.

OE Competence for Asian Vehicles

Asian vehicles set the global standard for quality and reliability. With Nisshinbo, you can enjoy the braking to match.

Nisshinbo brake friction is engineered in Japan, to the highest OE specification demanded by Asian vehicle manufacturers.

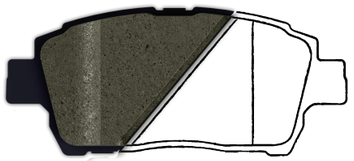
Every Nisshinbo brake pad is the result of a rigorous development and testing cycle. Featuring advanced material formulations and unique product design, Nisshinbo delivers the ideal combination of braking performance, comfort and reliability.

It's an investment in quality and innovation that makes Nisshinbo the largest supplier of OE friction to Asian vehicles – and the number one choice when you want a like-for-like replacement.

Unique Diagonal Slot

Nisshinbo brake pads feature a diagonal slot, designed to ensure optimal strength, flexibility and consistent performance, together with outstanding noise reduction.

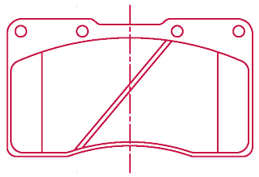
- **Strength and flexibility**
  The optimal degree of thermal expansion to prevent stress and surface cracking.
- **Noise prevention**
  Diagonal design evenly distributes the contact between the pad and disc minimizing noise and judder effect.



Nisshinbo J-Chamfer

Brake pad chamfers have a key role to play in reducing brake noise. The unique profile of the Nissinbo J-chamfer leads to longer lasting noise reducing properties of the Nisshinbo brake pads.

- **Unique J profile**
  Only available with Nissinbo brake pads for Asian vehicles.
- **Super-quiet**
  Specifically designed 'curve' reduces squeal, during bedding-in and throughout the working life of the friction material. Diagonal design evenly distributes the contact between the pad and disc minimizing noise and judder effect.



Nisshinbo Brake Discs and Brake Shoes

Nisshinbo brake discs are precisely tailored to our brake pads to achieve the perfect braking result. The Nisshinbo brake disc range is manufactured in strict accordance to O.E. tolerances and meets the ECE R90-requirements.

For rear axle applications Nisshinbo brake shoes provide optimum performance and safety.

Next generation NAO.

The energy efficiency vehicles of tomorrow are being driven by ever-more complex technology. Developed through advanced materials expertise, Nisshinbo NAO formulations are trusted to deliver the braking performance and environmental qualities demanded by world leading car manufacturers.

- **Sustainable Performance and Comfort**
  Advanced low dust, low noise NAO formulation, with no compromise in braking effectiveness throughout the friction lifespan.
- **Consistent Stopping Power**
  Tested to provide braking you can rely on 100%.
- **Long Lasting Quality**
  A new generation of NAO material, engineered for excellent wear characteristics and maximum replacement intervals.

Nisshinbo – OE Friction for 90% of Japanese Cars

Nisshinbo's range of Aftermarket products covers the vast majority of Japanese car makers and applications, with OEM parts from the world's biggest friction manufacturer.

Nisshinbo Part Numbering System

For example, NP 1001

1. NP for Nisshinbo Pads - ND for Nisshinbo Discs
2. The last 3 digits are simply counters without additional meaning

ND1001 Nisshinbo Disc for Toyota Camry
NP1001 Nisshinbo Pad for Toyota Camry

3. The first digit is determined by the car maker

Daihatsu	1	Proton	3	Hyundai	6
Lexus	1	Isuzu	4	Kia	6
Toyota	1	Mazda	5	Ssangyong	6
Infiniti	2	Asia Motors	6	Subaru	7
Nissan	2	Chevrolet	6	Honda	8
Mitsubishi	3	Daewoo	6	Suzuki	9
